CONNECTION

Knowledge Graph Based Retrieval-Augmented Generation for Multi-Hop Question Answering Enhancement → GraphRAG

WHY THIS CONNECTION EXISTS

Building upon Graph-based Retrieval-Augmented Generation (Graph RAG), we enhance multi-hop QA by leveraging structured knowledge graphs.

▼ Known limitations

No records available for this result.

▼ Research directions

- Improved multi-hop reasoning
- Robust GraphRAG evaluation
- Citation-aware research synthesis
- Efficient graph retrieval

▼ Recommended reading

1. Retrieval-Augmented Generation with Knowledge Graphs for Customer Service Question Answering
Directly connected to matched concepts/problems/methods through graph edges.
2. Dense Passage Retrieval for Open-Domain Question Answering
Directly connected to matched concepts/problems/methods through graph edges.
3. Knowledge Graph Based Retrieval-Augmented Generation for Multi-Hop Question Answering Enhancement
Directly connected to matched concepts/problems/methods through graph edges.
4. GRAG: Graph Retrieval-Augmented Generation
Directly connected to matched concepts/problems/methods through graph edges.
5. GNN-RAG: Graph Neural Retrieval for Efficient Large Language Model Reasoning on Knowledge Graphs
Directly connected to matched concepts/problems/methods through graph edges.
6. GNN-RAG: Graph Neural Retrieval for Large Language Model Reasoning
Directly connected to matched concepts/problems/methods through graph edges.

▼ Uncertainty notes

- The system reports overlap within the indexed corpus; it does not prove or disprove absolute novelty.
- Controlled-vocabulary matches are conservative and may miss terminology not present in the ontology.
- Relationship evidence is derived from paper metadata and abstract/title lexical matches; inspect the evidence IDs before relying on a claim.
